(UN)LIMITED DESIGN CONTEST
http://unlimiteddesigncontest.org/

(Un)limited Design in The Netherlands is a project of Premsela, Waag Society and Creative Commons Nederland in collaboration with the Dutch FabLabs. It was the first design competition to require users to develop Open Design projects that were at the same time possible to be manufactured in FabLabs. The projects range from furniture to fashion design to product design for food, and the exhibition has also expanded to other countries like France and is still going on every year.
